

FROM STREAM TO SEA

Test it. Learn from it. Become a Water Ranger!

Start here!

1. **Read the field guide** in the kit.
2. **Test the water** and note what you observe.
3. **Upload your data** using the shared library account (details on the back of this card)

***Want to share?** Tell others about what you discovered, or share a photo of your water testing adventure.*

LITERACY
COLLABORATION**

Watch the 7 minute training video

Share what you observed

Your test results matter most when they're shared. By sharing, it: adds to an open, public record of local water conditions; allows patterns to emerge over time; and helps researchers, community groups, and decision-makers see what's happening on the ground.

How to upload your data

1. Go to data.waterrangers.com
2. Log in using the library account below.
3. Add your observation to an existing location... or create a new one!
